Professional Experience

Environmental Project Assistant, AKRF Inc.
Present

October 2018 -

- Daily oversight of construction activities on multimillion dollar residential/mixed use projects in the five boroughs. Often overseeing foundation work from start to finish. Preparing daily/weekly/monthly reports of construction activities to be submitted to City or State Project Managers.
- Coordinate daily/weekly work scope with General Contractors, Site Safety Managers, Engineers and Site Supervisors. Attending weekly/biweekly safety and contractor meetings. Conduct Health and Safety meetings.
- On-site responsibilities include soil management and disposal, coordinating soil trucking, inspection of environmental components in the Subgrade and building, and making sure environmental components will align with structural drawings.
- Drafting budgets and work plans for short term contracts, scheduling subcontractors, ordering rental equipment, and arranging lab services.
- Perform remedial investigations characterizing soil types, collecting various types of samples (including soil, groundwater, and air samples).
- Installing and performing monthly/quarterly inspections of SSDS and SVE systems.
- School Construction Authority (NYCSCA) water disinfection oversight.

Engineering Technician, Advance Testing Co. January 2018 - October 2018

- Assisting Contractors, Project Managers, Site Supervisors, and Engineers with the building process. CONducting QA/QC tests to ensure work complies to specifications.
- Reviewing Architectural and Engineering plans to review inspection locations and building specifications.
- Obtain construction material samples and conduct quality control field and lab tests.
- Generates detailed daily reports to submit to clients or often the DOT.
- Overseeing construction of state bridges and roads, theme parks, stores, and waterline restoration.
